Whether you are running high-volume production jobs or one-off prototypes, Royal's broad range of flexible workholding systems for your 3, 4, and 5-axis machining centers has you covered.

**External Part Gripping
Hydraulic/Pneumatic**

**External Part Gripping
Manual Actuation**

**Internal Part Gripping
Hydraulic/Pneumatic**

- Superior to vises for many applications – especially 5th-axis
- Run a single unit or gang multiples together

Need a Better Way to Grip Parts on Your Machining Center?

- Actuate via air, hydraulics, or manually
- Precision **repeatability within tenths**
- Exceptional tool clearance and chip evacuation
- Wide collet/sleeve gripping range overcomes variations in part ●
- dimensions while maintaining both grip force and accuracy
- Custom part locators and air sensing available
- Huge inventory in-stock for same-day shipping

Custom-shaped collets are perfect for second-op work because they provide full surface contact for reduced risk of part distortion.
