TuffCut[®] 3MV Square End and Corner Radius Options

TuffCut[®] 3MV

TuffCut[®] 3MV Series of Micro High Performance End Mills

The TuffCut[®] 3MV Series micro end mills may be small, but they deliver massive performance by combining our ALtima[®] Xtreme coating and a 3 flute variable helix design. The 3MVR and 3MVS offer precision machining in medical and aerospace grade materials such as stainless steel, titanium, and high temp alloys.

They are available in standard (3MVR) or stub length (3MVS), plus a choice of square end, corner radius and neck relief options, making them highly versatile and effective.

Both the 3MVR and 3MVS range from 1/64" to 1/8" in metric diameters. They are manufactured using ultrafine carbide, for extended tool life, and can be used in slotting, HEM and finishing applications.

 High Performance Carbide
 Where high performance is the standard

TuffCut® End Mills
 Made in best TuffCut® Carbides from the Alloy Process TuffCut®

TuffCut® XV - Series XV7CB

- Corner relief and geometry for increased wear
- 8° rake, specially profiled geometry for smooth cutting action and reduced harmonics
- Sharp nose edge for increased strength - tough to machine materials
- Continuous edge and staggered flute water system for both roughing and finishing applications
- Alumin® Coating provides optimal heat and wear resistance allowing for increased tool life

ALUMIN®	SC	COATING	FLUTE	FLUTE	FLUTE	FLUTE
